- Didn't really have to prepare anything?? But he knew the content so was very prepared in that sense
- Not only did he know all the content from the tutorial, he also remembered what it was like to take this course as a student. This meant that he could understand how many students were feeling about each topic.
- Always there, and always on time.
- Yup! Not perfect, hah, but the tutorial questions were all there & they were up to scratch on what to expect.
- You guys are great! Thanks for the extra tutorial session for the lab!
- Keep him on.
- Brought his book and knew everything

2 - My TA/lab demonstrator/tutor was able to effectively communicate ideas and information.

- The tutorial he ran for the lab was really helpful and cleared up any confusion.
- Every time I approached him with a question he was able to answer it in a way that I understood, and also was able to explain any greater or important context around the idea. Since he was able to remember taking this paper as a student, he was often able to understand how I thought of or approached an idea and was able to explain the idea better.
- Much respect for Joel to follow up questions with students in subsequent tutorials if he didn't know the answer the first time.
- A great teacher!
- Joel's passion for engineering and controls really comes through when he explains a principle. It was great to work with him.
- So good. 10/10 went to him for every problem

- I really appreciate your help during the tutorial and for the lab.
- He was enjoyable to talk about the ideas in this course to. He also put in the extra effort if needed, such as going and looking into a question in his own time, if he could not explain it at the tutorial, and getting back to the student.
- Very approachable and easy to deal with, very willing to help and make sure the student understands. Cheers!
- Definitely a fine tutor, I just wish I had asked more questions to improve my grade.
- He was really nice! Super kind!
- Really engaging tutor
- So enthusiastic and always went above and beyond when I asked a question, aiming to give the most complete answer he could. A really really great TA :)
- I had an extra one-on-one session with Joel due to concerns with the course work and he was very helpful - was easy to understand and he conveyed his points clearly
- I went to the PID control tutorial, helped significantly. Well organised with material posted on learn for further response to a student's question. Awesome!
